Work Experience

AI Made Easier - Frontend Web Developer Intern

August 2025 - Present

- Rebuilt the frontend architecture from scratch using Next.js, improving performance and scalability
- Translated early-stage concepts into polished UI/UX designs in Figma and implemented them with production-ready code
- Developed and integrated API routes to connect the frontend to backend services, ensuring seamless functionality across the application

Versus X - Full Stack Web Developer Intern

August 2025 - January 2026

- Collaborated across frontend and backend to optimize end-to-end product functionality and user experience
- Enhanced dashboard usability by refining React components and improving UI clarity.
- Built and maintained reliable API routes with Express.js and implemented improved error logging for better debugging
- Created on-demand graphics using Photoshop and Canva to support product visuals and branding
- Shipped incremental updates using Git/GitHub, practicing version control and iterative development

Upwork - Freelance Developer

November 2023 - August 2025

- Developed custom client websites on Wix, Shopify, and Squarespace, translating client ideas into functional, user-friendly web pages
- Collaborated directly with clients throughout the design and development process, strengthening communication skills and the ability to explain technical concepts clearly
- Managed full-site setup, including domain registration via GoDaddy, ensuring seamless deployment and live readiness

Education

Western Governors University - Computer Science

Williamsburg Academy - High School
